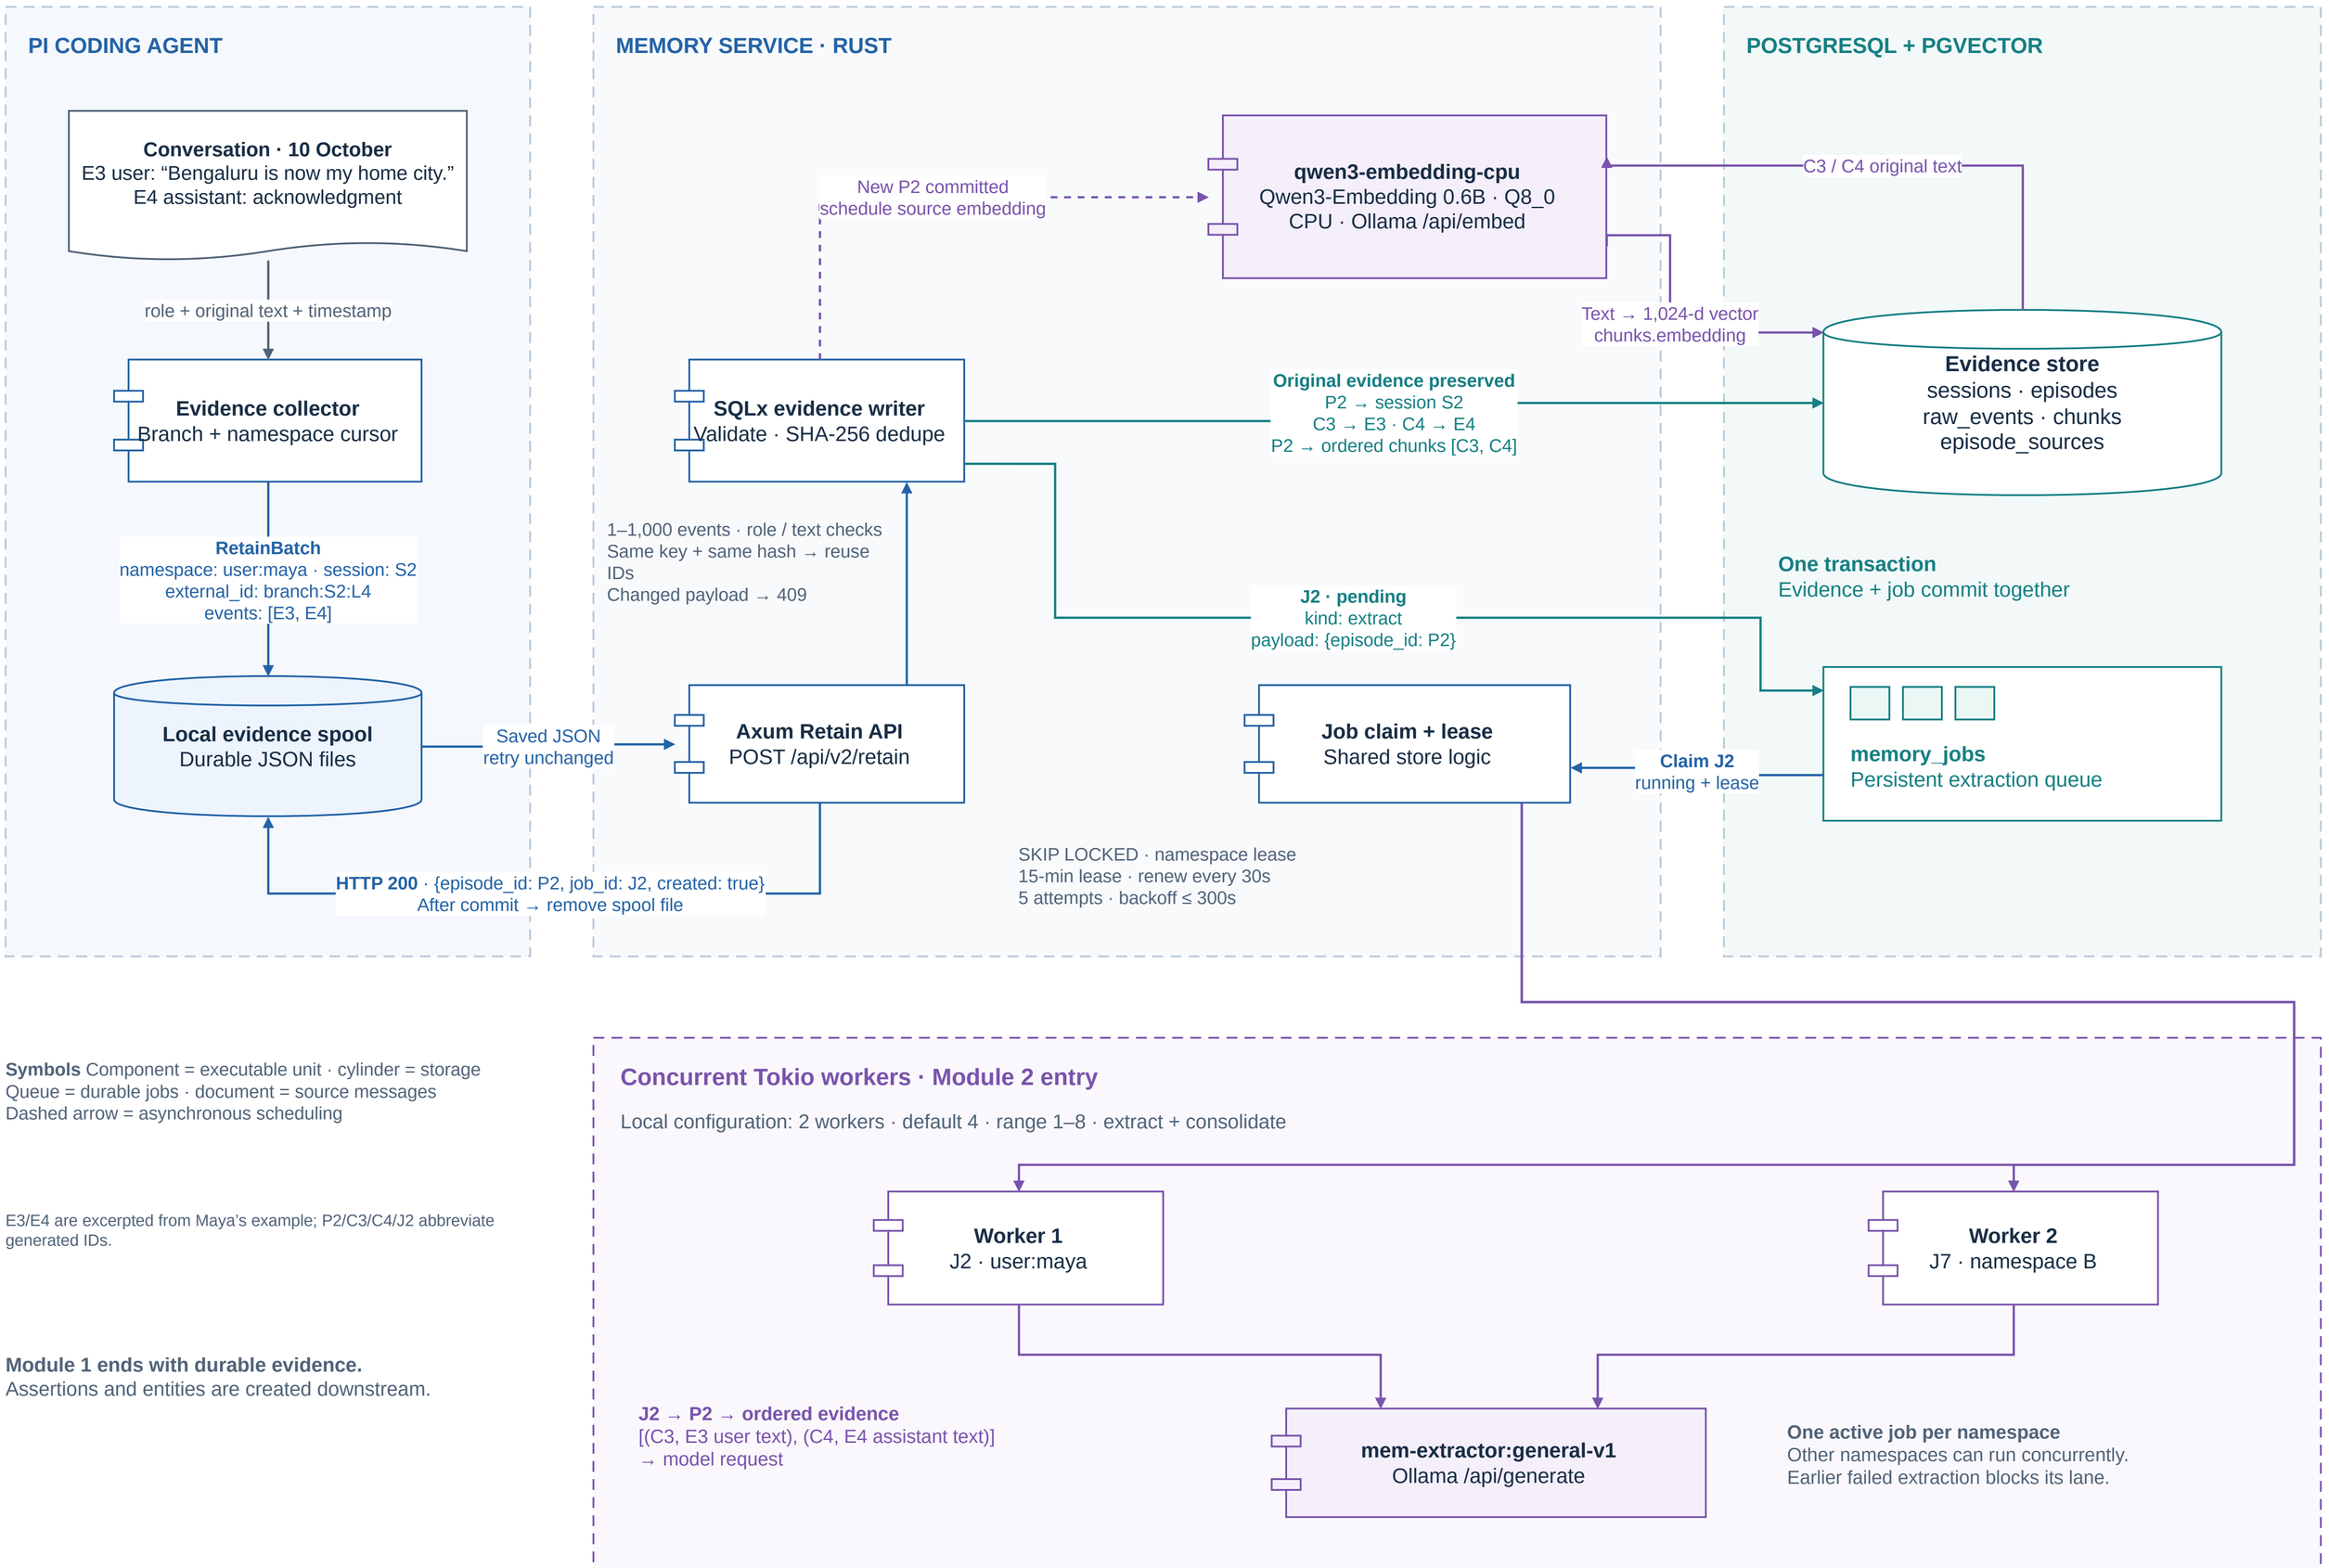
Module 1 · Evidence Acquisition & Processing

Capture → durable delivery → atomic persistence → extraction handoff



Symbols Component = executable unit · cylinder = storage
Queue = durable jobs · document = source messages
Dashed arrow = asynchronous scheduling

E3/E4 are excerpted from Maya’s example; P2/C3/C4/J2 abbreviate generated IDs.

Module 1 ends with durable evidence.
Assertions and entities are created downstream.

Separate projection worker: project / rebuild / clear_graph. Source embedding: 2 concurrent tasks, independent of this pool.
